CONTENTS

Volume 3, Issue Nos. 1-4

Issue Number 1

PUBLISHER'S NOTE.....	1
EDITORIAL: IN THE NAME OF COMMUNICATION..... <i>Gilbert W. Meier</i>	3
EFFECTS OF AGE AND STIMULUS CONDITIONS ON THE EMOTIONAL RESPONSES OF RHESUS MONKEYS: DIFFERENTIAL RESPONSES TO FRUSTRATION AND TO FEAR STIMULI..... <i>Stephen Bernstein and William A. Mason</i>	5
NOREPINEPHRINE AND DOPAMINE IN THE DEVELOPING CHICK BRAIN <i>Kenichi Kobayashi and Samuel Eiduson</i>	13
TRANSFER OF A LEARNED FORM DISCRIMINATION IN THE INFANT AND ADULT MONKEY..... <i>Robert R. Zimmermann</i>	35
THE EFFECTS OF SEPARATION AND REUNION ON THE BEHAVIOR OF MOTHER AND INFANT SQUIRREL MONKEYS..... <i>Joel Kaplan</i>	43
CYCLIC AMP AND ADENYL CYCLASE IN THE DEVELOPING RAT BRAIN <i>M. J. Schmidt, E. C. Palmer, W-D. Deltbarn, and G. A. Robison</i>	53
ANNOUNCEMENTS.....	69

Issue Number 2

TEXTURE DENSITY AND NORMAL DEVELOPMENT OF VISUAL DEPTH AVOIDANCE..... <i>Bernard Z. Karmel, Patricia N. Miller, Lawrence Dethweiler, and Gary Anderson</i>	73
ONTOGENESIS OF SLEEP IN HUMAN PREMATURES AFTER 32 WEEKS OF CONCEPTIONAL AGE..... <i>C. Dreyfus-Brisac</i>	91
ELEVATED CATECHOLAMINES IN THIRTY-DAY-OLD CHICKEN BRAIN AFTER DEPLETION DURING DEVELOPMENT.. <i>Sheldon B. Sparber and Frederick E. Shideman</i>	123
INTERACTION OF GENOTYPE AND ENVIRONMENT AS DETERMINANTS OF CORTICOSTEROID RESPONSE TO STRESS..... <i>David M. Treiman, D. W. Fulker, and Seymour Levine</i>	131
BOOK REVIEW.....	141

Issue Number 3

EXPERIMENTAL MODIFICATION OF BRAIN WEIGHT AND BEHAVIOR IN MICE: AN ENRICHMENT STUDY.....	<i>Ruth-Ann Collins</i>	145
STUDIES OF UNDERNUTRITION IN THE YOUNG RAT: METHODOLOGICAL CONSIDERATIONS.....	<i>S. Michael Plaut</i>	157
PROCEDURES FOR THE STUDY OF BEHAVIOR IN AVIAN EMBRYOS.....	<i>Joseph K. Kovach, Duane Callies, and Rex Hartzell</i>	169
EFFECTS OF MALE ODOR DURING INFANCY ON THE MATURATION, BEHAVIOR, AND REPRODUCTION OF FEMALE MICE.....	<i>James M. Kennedy and Kenneth Brown</i>	179
TAURINE LEVELS IN DEVELOPING RABBIT BRAIN AND OTHER ORGANS.....	<i>Rita Chanda and Williamina A. Himwich</i>	191
STRAIN-SPECIFIC EFFECTS OF CHRONIC PRENATAL IRRADIATION IN MICE.....	<i>Rune J. Simeonsson and Gilbert W. Meier</i>	197
MATERNAL BEHAVIOR: DIFFERENCES BETWEEN MOTHER AND VIRGIN MICE AS A FUNCTION OF THE TESTING PROCEDURE.....	<i>R. Gandelman, M. X. Zarrow, and Victor H. Denenberg</i>	207
BOOK REVIEW.....		215

Issue Number 4

SIMPLY PRODUCED CLOSED-HEAD, FOCAL LESIONS FOR STUDY OF REPAIR IN IMMATURE RAT CEREBRAL CORTEX.....	<i>Lester M. Geller, David Cowen, and Abner Wolf</i>	217
EFFECTS OF PRENATAL ADMINISTRATION OF PSYCHOTROPIC DRUGS ON BEHAVIOR OF DEVELOPING RATS.....	<i>Carol V. H. Clark, Darrell Gorman, and Antonia Vernadakis</i>	225
EFFECTS OF ADRENALECTOMY ON MATERNAL BEHAVIOR IN RATS.....	<i>Evelyn B. Thoman and Seymour Levine</i>	237
CARE OF YOUNG UNDER COMMUNAL CONDITIONS IN THE MOUSE (MUS MUSCULUS).....	<i>Ronald Gandelman, Richard E. Paschke, M. X. Zarrow, and Victor H. Denenberg</i>	245

CONTENTS v

EXPERIENCE AND THE ORB WEB.....

Information for Contributors

DEVELOPMENTAL PSYCHOBIOLOGY will promptly publish papers dealing with physiological, behavioral, or genetic studies of the developing organism. These may include research reports, theoretical treatises, notes on apparatus or methodology, proceedings of symposia, and monograph supplements. In addition, the Journal will carry letters to the editors, announcements of general interest to our readers, and book notices.

Materials should be sent directly to the Editor-in-Chief, Dr. Gilbert W. Meier, Box 319, George Peabody College, Nashville, Tennessee 37203, U.S.A., or your nearest Regional Editor. Publication is anticipated in six months or less after acceptance. Papers must not be submitted simultaneously to, or have been previously published in another journal except as an abstract or brief, preliminary report.

Authors should follow a clear, concise style. Articles should be typewritten on one side of 8½ x 11 inch paper of good quality, double-spaced throughout, have a wide margin all around, and be submitted in three copies (ribbon plus first two carbon copies) complete with tables and illustrations. All pages should be numbered serially beginning with the title page.

Research reports should be subdivided into the following sections: *Synopsis* (no heading required), *Introduction* (no heading required), *Method*, *Results*, *Discussion*, *Notes* (if applicable), *References*.

Language: English will be the language of publication.

Title: The title should be typed on page 1 of the manuscript together with author(s); laboratory or department and institution of origin; city, state, country; complete address for receiving proofs and reprint requests. Names of authors should be positioned vertically and grouped to avoid repeating an affiliation. If desired, additional affiliations or present addresses of authors may be stated in the *Notes* section. A short, running title of not more than 50 characters (including spaces) suitable for alternate page headings should be typed on page 2 of the manuscript, if the full title exceeds this limitation.

Synopsis: The synopsis should adequately summarize the paper in no more than 200 words and be typed on page 3 with a list of up to 12 words or phrases suitable for indexing purposes.

Notes: This section will include all material that otherwise would appear as footnotes, with the exception of the date the manuscript is received at the editorial office and table footnotes. *Notes* should be typed

on a separate page following the *Discussion* section. If they relate to the title or the authors, *Notes* should not have superscripts. Text footnotes should be numbered consecutively throughout the paper with superscripts in Arabic numerals. Table footnotes should be lettered consecutively within each table with superscripts in lower case Roman.

References: Authors cited in the text should be indicated by family name followed by year of publication (e.g., Hilton, 1967). When a reference has more than two authors, all the names should be used in the first citation, and on subsequent citation thus: (Hilton *et al.*, 1967). Where more than one paper by the same author(s) have appeared in one year, the convention will be: (Hilton, 1967a,b). Journal title abbreviations listed in *Index Medicus* should be used.

Form for journal reference: Alexander, G. J., Miles, B. E., Gold, G. M., and Alexander, Rita B. (1967). LSD: Injection early in pregnancy produces abnormalities in offspring of rats. *Science*, 157:459-460.

Form for chapter reference: Meier, G. W. (1968). In search of the engram: In the nursery. In G. Newton and S. Levine (Eds.), *Early Experience and Behavior*. Springfield: Thomas. Pp. 338-364.

Units of Measurement and Symbols: Examples: 5 µg 2 g 9 ml 8% ¹I. Units of measurement are abbreviated and unpunctuated when used with numerals.

Illustrations: These should be identified on the back lightly in pencil with number and author's name, indicating "top." Prints of figures should be sharp, clear, and glossy. Half-tones should be glossy, strongly contrasted prints. Captions should be typed on a separate sheet at the end of the manuscript. Indicate approximate point of insertion in the text.

Magnification of photomicrographs should be stated together with dimensional scale.

Tables: Each table should be typed on a separate sheet, indicating approximate point of insertion in the text.

Proofs: Printer's errors should be indicated marginally on the proofs. Other changes on the proofs may be charged to the author.

Reprints: The author will receive with his galley proofs a reprint order form which must be completed and returned with the proofs. Senior authors will receive 50 reprints of their articles without charge.
